#	Question Title	Answer
1.	Please select the site for which you are answering these questions. For more than one site please fill out the survey again. If you are unsure, you	STAR Brookhaven
2.	When will you complete, or have you already completed this CA distribution transition for the types of services listed below.	

	Completed	1 Oct. 2008	1 Nov. 2008	1 Dec. 2008	1 Jan. 2009 or later	Not Applicable	I dor know
Compute elements	X						
Storage Elements						X	
VOMS servers							X
GUMS servers							X
Client installations	X						
3. Please rate OSG in how well this transition is being handled.	OK						
4. Additional comments and feedback you would like to provide for OSG regarding this transition.	All went smoothly following the instructions (for OSG 0.8.0), except "vdt-control --off" did not stop the RSV probes, so I wound up with two sets of them running at the end. Easy enough to fix and no problems noted since. The email thread and discussions at meetings had me concerned that this was going to be a hassle that wasn't initially well thought out. In the end though, it seems to have worked out, so perhaps all that discussion was useful and resulted in a satisfactory process after all. Still, I'm glad I waited until the smoke had cleared a bit.						
5. Please provide your name and email address.	Name: Wayne Betts Email address: wbetts@bnl.gov						

2. Thank You!

1.	Please select the site for which you are answering these questions. For more than one site please fill out the survey again. If you are unsure, you	FermiGrid
2.	When will you complete, or have you already completed this CA distribution transition for the types of services listed below.	

	Completed	1 Oct. 2008	1 Nov. 2008	1 Dec. 2008	1 Jan. 2009 or later	Not Applicable	I don't know
Compute elements		X					
Storage Elements							X
VOMS servers		X					
GUMS servers		X					
Client installations							X

3. Please rate OSG in how well this transition is being handled.	Poorly
4. Additional comments and feedback you would like to provide for OSG regarding this transition.	Pacman mechanism worked fine. But the command and control on the way to announcing it was very very bad. But for our early detection of the planned changes in the default CA package, four VO's would have been out of business.
5. Please provide your name and email address.	Name: Steve Timm Email address: timm@fnal.gov

2. Thank You!

2.	When will you complete, or have you already completed this CA distribution transition for the types of services listed below.	

	Completed	1 Oct. 2008	1 Nov. 2008	1 Dec. 2008	1 Jan. 2009 or later	Not Applicable	I don't know
Compute elements			X				
Storage Elements							X
VOMS servers			X				
GUMS servers			X				
Client installations							X

3. Please rate OSG in how well this transition is being handled.

Poorly

4.

Additional comments and feedback you would like to provide for OSG regarding this transition.

This transition has already resulted in a near miss on the eve of the LHC turnon. We have 2000+ systems to upgrade, and we have to negotiate for time to perform these changes with the system stakeholders.

Transitions of this sort need to be well publicized and allow for a significant transition period.

5. Please provide your name and email address.

Name: Keith Chadwick
Email address: chadwick@fnal.gov

2. Thank You!
