# Extensions & Applications Support

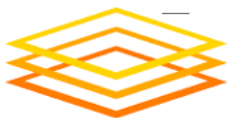

---

Torre Wenaus (BNL)  
Frank Würthwein (UCSD)

# Milestones

- ⇒ 1.3.1 Liaise with users --- all milestones met so far.
- ⇒ 1.3.2 Extensions
  - 1.3.2.1 reliability and Scalability of OSG CE
    - Missed “CE Overload Task Force Report” 3/1/07
      - Task force never actually started.
  - 1.3.2.2 Data Storage Access and Management
    - Missed “Complete Site Functional Test ...” 3/1/07
    - Missed “Complete OSG level transfer accounting” 3/1/07
      - Have probe prototype and repository
      - Have deployed at one site
      - Missing display and widespread deployment
      - I’d argue we have met the milestone for March as I didn’t expect to be any further than we are.
  - 1.3.2.3 Missed “Document Support Model” 3/107
    - I’d argue we are learning as we are doing and are making huge progress with the Storage Forum and the Storage Office Hour. We should change the WBS accordingly. It seems that this date may anyway be a typo.
  - 1.3.2.4 LIGO, VDS, Pegasus related milestones --- all met so far.
  - 1.3.2.5 Panda et al. --- all met so far.
  - 1.3.2.7 Client Tools -- missed for OSG 0.6 -- not clear what’s desired!
  - 1.3.2.8 Provide Requirements to OSCET -- not clear if still relevant?

# Summary

## ⇒ **Resources are very tight**

- Hurting at UCSD due to hiring delays
- Hurting at Caltech due to personnel change
- Hurting at BNL due to hiring delays
- Ok at FNAL, I think.
- Ok at Cornell, I think.

## ⇒ **Nevertheless making lot's of progress**

- Majority of milestones are being met.
- By and large follow the plan, and in some cases exceed expectations.
