

Area Coordinators Metrics & Measurements

June 3, 2010
Brian Bockelman

Recently Accomplished

- New {dCache|xrootd}-transfer probes.
 - Breadth of deployment is still underwhelming.
Some ideas here.
- Increasing amount of “day-to-day” metric activities taken over by new personnel (and existing ones like Karthik).
- Monthly reports, upcoming NSF report, maintenance of webapp, updating email reports.
- Minor updates to OSG-Display (video!)

Upcoming Activities

- Looks like FY I I gratia effort will be concentrated on better handling of pilot/payload accounting.
- Science field becomes useless w/o this.
- Starting to re-explore opportunistic use measurements with Dan and Chander.
- This time, will build them some new tools.
- Info-Services probe in next RSV release.
