Virtual Machines	18.2% (2)	36.4% (4)	9.1% (1)	0.0% (0)	36.4% (4)	1.86	11
Monitoring	18.2% (2)	27.3% (3)	18.2% (2)	0.0% (0)	36.4% (4)	2.00	11

[Hide replies](#) Any comment about the sessions?

4

1. We need to have security not up against the install fest next time, I have missed the security sessions twice in a row.
Virtual machine guys were excellent--I learned a lot!

2. The time taken in the plenary section to introduce the various sessions was largely a waste of valuable time. Session agendas should have been posted online ahead of time (which they mostly were, thank you) and made available in print for those arriving undecided about which sessions to attend.

Tue, Aug 11, 2009 5:58 PM

(I didn't need to hear that in the networking session we would discuss <...drumroll...> tools for network troubleshooting and so on.)

I found the use of split sessions very unfortunate. I missed out on the opportunity to upgrade my site in order to attend the other sessions. Networking, Security and Monitoring are all very important for site admins (new and old), but new site admins in particular were stuck either installing their new site, OR learning what to do with the installation and how to make it better. The potential message was that security, monitoring and networking performance are afterthoughts for sites, which is not a good message.

I appreciated the effort to make hands-on exercises in the networking and VM sessions, though in the end got very little out of the exercises. The discussions however were useful and informative.

The VM session almost didn't fit in here - the role of site admins and the affects of VMs on sites did not get much discussion - not that it wasn't useful, but it was farthest afield in some sense. This is fitting though, since VMs are not very "active" in the current grid usage, whereas security, networking and monitoring are all "old" topics (despite the continual introduction of new tools and resources).

3. It would have been nice to have more time in the SE/HA GUMS sessions to be able to do a hands-on installation. It felt like all of the time was given to presentations on the install process, but not enough non-presentation time dedicated to performing actual installs with the experts to give hands-on advice.

3. During the workshop were you able to install/upgrade any of the following?

[Create Chart](#)[Download](#)

	Response Percent	Response Count
CE <input type="checkbox"/>	60.0%	3
GUMS <input type="checkbox"/>	60.0%	3
HA GUMS	0.0%	0
SE: BeStMan gateway over FS <input type="checkbox"/>	40.0%	2
SE: BeStMan-xrootd	0.0%	0
SE: BeStMan-hadoop <input type="checkbox"/>	20.0%	1
Hide replies Other (please specify) <input type="checkbox"/>	20.0%	1

1. Installations done when I got back to home institution. I am going to try BeStMan-xrootd from the instructions.

|---|----------------------------|---|
| 1. 2 full days, more breakouts. | Thu, Aug 13, 2009 2:41 PM |  Find... |
| 2. A bit longer meeting somehow, though I understand the value of keeping it short. Slightly longer workshop sessions in particular would have been appreciated, possibly accomodated by shortening the plenary, which did not benefit much from the lightning overviews. | Tue, Aug 11, 2009 5:58 PM |  Find... |
| 3. But it would have niceto have the requirements for the hands on posted sooner so one could prepare ahead of time | Tue, Aug 11, 2009 11:28 AM |  Find... |
| 4. Shorten the plenary and give more time for the hands on stuff. Maybe consider a 2 1/2 day workshop, | Mon, Aug 10, 2009 2:56 PM |  Find... |

possibly running sessions more than once at different times so people could avoid having to pick and choose.
