Subject: Re: Reminder - OSG Area Coord Mtg - Thu, Feb 14, 11:30 central

I'm in meetings all day today, so I don't think I can Twikify my report by 11:30. Here is my report:

1.1 Software Coordinator Report for the month ending 14-Feb-2007

Current Initiatives:

- Working on VDT update, due February 15th
 - + new dDcache (distributed as RPMs)
 - + new SRM client, dCache client (dccp) and LCG-Utils (distributed in Pacman distribution)
- Working on new VDT release, due March 17th
 - + Globus built against system OpenSSL
 - + New VOMS and VOMS Admin
 - + AIX support
 - + Debian 4 support
 - + New GridFTP for MOPS support
 - + Other tasks as we are capable
- Meeting with VOMS developers
- Hiring 4th VDT member

In the last month & Concerns

- Progress on the initiatives above
 - + Feb 15th update is on target, except maybe for LCG-Utils, which can be next week
 - + VDT release going okay. Worries
 - * Globus build slower than hoped. Good feedback from Globus.

Almost there

- * VOMS and VOMS-Admin slow, but good help from devs
- * Generally worried about ability to get it all done--picture will be clearer next week
- + Hiring is slow, but progressing.
- + Meeting with VOMS developers very good, in progress
- + Attended EGEE-WLCG-OSG meeting

-alain
