

OSG Production Report

OSG Area Coordinator's Meeting
May 18, 2011

Dan Fraser

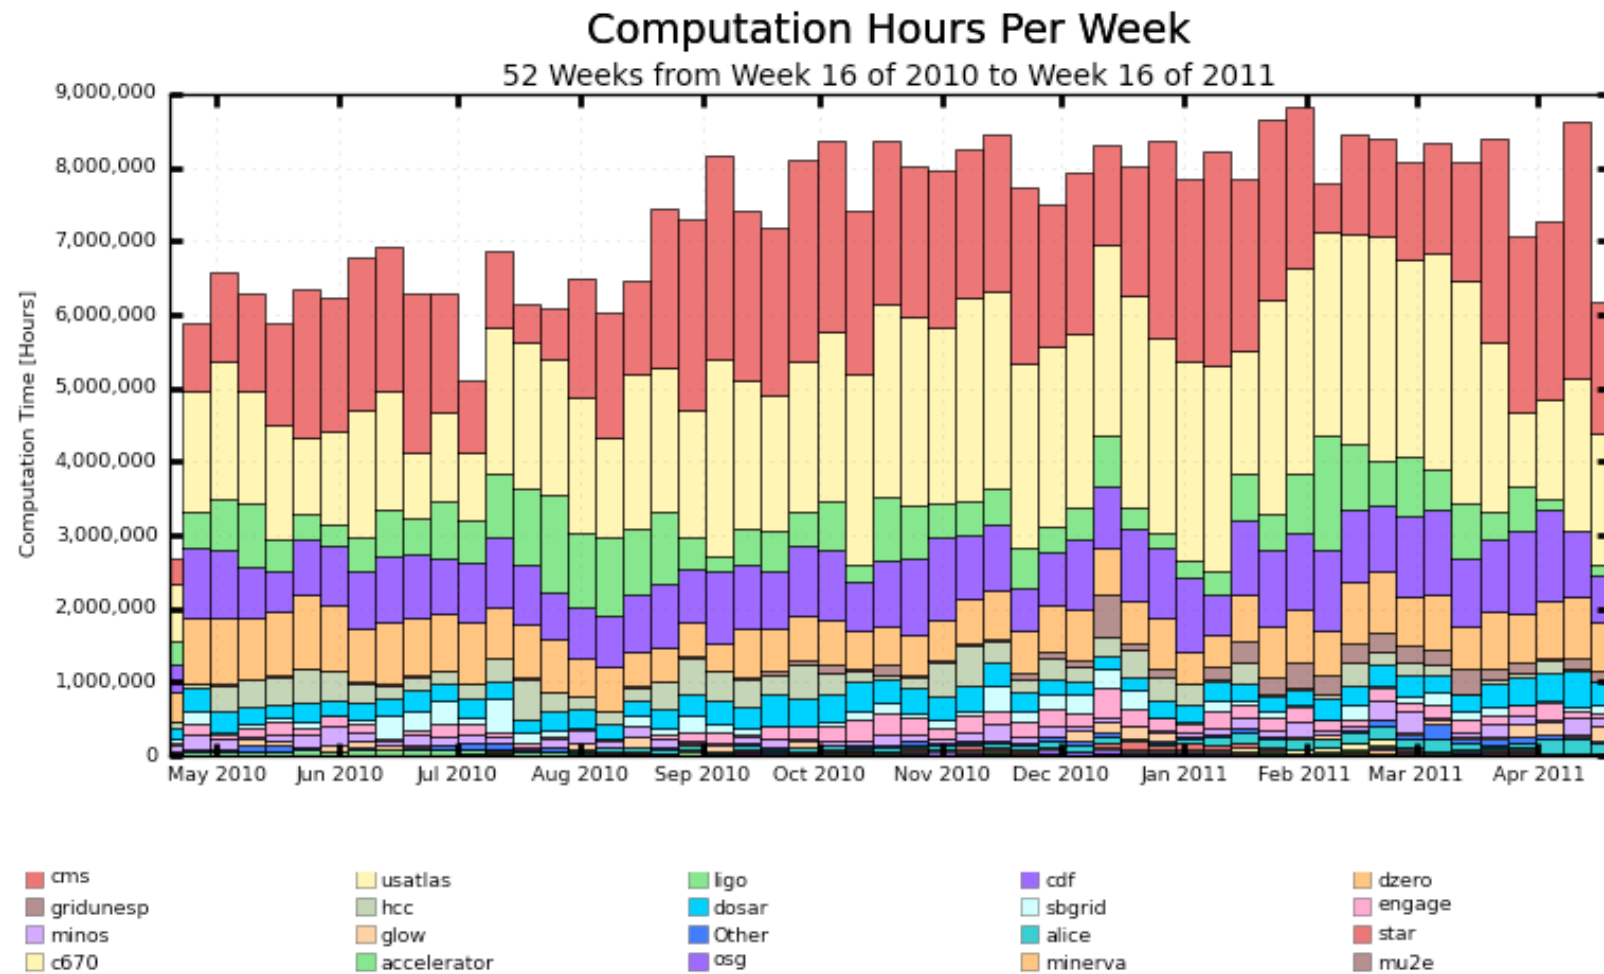

No WBS changes

- 1.0.2.1 Identify and articulate OSG issues that impact the effectiveness of sites & VOs and lead/coordinate OSG teams to resolve the issues
 - Items 1.0.2.1.1 – 1.0.2.1.4
 - Ongoing 75% Complete

1.0.2.1.4 Example

- Analyze the usage patterns and efficiency of resource utilization, and develop trend data for the OSG; use that data to propose improvement plans for the facility.
 - Data transfer graphs
 - Error graphs
 - Daily displays

Overall Production

Some Production Issues...

- Effort from the entire team

- WLCG RSV availability bug (resolved eventually)
- BDII failover system now running stably (outside IU firewall)
 - Introduction of a third BDII
 - Testing of BDII updates (still no stable V5)
- Atlas MWT2 at Chicago now supporting opportunistic usage
- Pigeon test issues impacting site reports
- LIGO issues with access to BNL
- HTPC now available on two ITB sites
- SuraGrid interest in joining OSG – began interfacing through the VO team.
- YUM repositories in OSG
- DOE Grids CA outage
- Security facility upgrade negotiations
- ...
