

Deconstructing Science Problems into Parallel Jobs

Wednesday afternoon, 1:15p

Zach Miller < zmiller@cs.wisc.edu >

Systems Programmer Condor Project

Decomposing Large Tasks

- We've used blast as an example
- Take it to the next level try to run yeast.aa against drosoph database
- You will need grid resources to accomplish this
- Is your job sized correctly?

OSG Summer School 2011

Let's try also with fractals

- Make a 4096 by 4096 image
- One MILLION iterations
- How many tiles should you use?
- (How do you know?)

OSG Summer School 2011 3

Fractal Generation

Let's make some cool images!

-.74992 .01495 .0002

-.749923 .0149166 .00001
