# Area 3.1: Internal Metrics

Brian Bockelman
Thursday, 2 April 2009

What we've been doing

- Internal Metrics is progressing: Everyone should have been contacted at least once and recently.

  - We now have a Word doc we'd like to get all areas to fill out - coming soon.

- Monthly metrics.

- RSV reporting maintenance.

- Installed Capacity - coordination of effort.

- Science areas deliverable

- Prepping for a ISGC presentation in mid-April.

OSG: 1 Billion KSI2K-Hours in Year 3?

Cumulative Hours Spent on Jobs By VO
158 Weeks from Week 06 of 2006 to Week 07 of 2009

cms (86,497,013) · cdf (48,503,197) · usatlas (45,926,864) · dzero (43,243,152) · miniboone (3,732,368)
ligo (3,566,811) · engage (3,426,292) · nysgrid (2,704,179) · star (2,282,329) · minos (2,224,868)
Other (1,860,280) · dosar (1,688,614) · glow (1,230,125) · ilc (1,081,253) · nanohub (879,246)
gpn (599,309) · cdms (374,902) · mipp (326,858) · gridex (241,554) · gadu (173,065)

Total: 250,562,290 Hours, Average Rate: 2.61 Hours/s

Where We're Going

- Putting together some "predictions" of OSG usage in the next few months

- As most of the Installed Capacity organization has died down (folks are now working), we're picking Internal Metrics back up full steam.

  - We'll be spamming an inbox near you.

- Continued push to keep Metrics webapps going to the GOC and away from Nebraska to maintain operational sanity. Collaborating with MyOSG folks.
