OSG Project Manager's Report
for
OSG Council Call

November 10, 2009
Chander Sehgal

OSG Year3 WBS Closed

1. Final completion status for each WBS item updated by owners

2. For any WBS that is incomplete,
   a) we documented reason for incomplete status
   b) evaluated recommendation by WBS owner to drop the item or carry-over to year4

3. All recommendations on incomplete items reviewed with the OSG Executive Director by the OSG Project Manager

4. Final status with disposition of WBS items posted at
https://osg-docdb.opensciencegrid.org:440/cgi-bin/ShowDocument?docid=781

OSG Year3 WBS Statistics

Open Science Grid

<u>518 Total Tasks</u>

144 Summary Tasks
374 Work Tasks

280 Completed Tasks
94 Incomplete Tasks

43 Terminated (no longer applicable)
51 Carried over to Year4 WBS

Year4 SOW Status

All year4 SOWs available as draft or better; see
https://osg-docdb.opensciencegrid.org:440/cgi-bin/ListBy?topicid=82

1. *Fully approved:* **Nebraska, Florida, Clemson, HMS, UCSD, Fermilab**

2. *Awaiting Sign-off by SRO*: **Caltech, UIUC, U-Chicago**

3. *Awaiting Sign-off by ED & TD*: **BNL**

4. *Awaiting Sign-off from institutional PI*: **Indiana, Wisconsin, RENCI, LBNL, Internet2**

Year4 Stakeholder Requests

- Work request documents received from CMS (Frank Wuerthwein), ATLAS (Michael Ernst); LIGO work requests assembled by OSG Project Manager based on various emails, etc.

- Documents parsed to identify embedded requirements which are tagged

- Each tagged requirement assigned to a member of OSG Staff

- Each tagged requirement mapped to WBS or STG (Software Tools Group) number

- Cross-mapped requirements documents posted at
https://osg-docdb.opensciencegrid.org:440/cgi-bin/ShowDocument?docid=909

Example

As a result of this special dependency of CMS on this service, *we request that OSG plan ahead, and develop mechanisms in time to increase the [BDII] scale as the load increases* . <WBS 1.2.2.2; Quick>

OSG Year4 WBS Status

- Staffing Plan, WBS, list of Area Coordinators posted at
https://osg-docdb.opensciencegrid.org:440/cgi-in/ShowDocument?docid=891

- WBS is almost final; pending last minute changes in specific goals due to SOW review and approval process

- Plan is to baseline WBS by Dec 5 and start monthly status updates via the existing process on the OSG twiki

OSG TG Allocations Collaboration

- OSG and TG are jointly investigating methods for providing allocations for cross use across these two CI frameworks

- Need input from OSG Council on what OSG can/should commit to TG when a TG user wants access to OSG resources
  - Just opportunistic
  - Opportunistic with some guaranteed amount over an interval (e.g. month)
  - Other scenarios?
