#	Question Title	Answer
1.	**Please select the name of your Virtual Organizaiton**	LIGO

2. **How long will it take for your VO to complete the transition for the new locations for CA certificates distribution points?**

VOMS servers			X			
GUMS servers					X	
Client installations			X			

3.

Additional comments, questions or
clarification.

These are rough estimates based on conversations with a few
sites. I have sent out a formal survey internal to LIGO's OSG
Sites, which should be more accurate and available at the end
of the week.

We are also investigating how these changes impact the LIGO
Data Grid and how best to proceed there from a logistics and
practical point of view but don't expect to have closure on the
evaluation until the end of the month.

GUMS servers					X	
Client installations		X				

3.	Additional comments, questions or clarification.	The OSG VO has no resources and therefore no CEs, SE, GUMS. The VOMS server is hosted by Fermilab/FermiGrid team. As far as Client Installations -- I will have to do a poll of the users. It will be useful to be able to see the reports from VOs who have already filled this survey out.. is there a way to do this? thank you Ruth
